

# DATA SCIENCE EAST AFRICA

## CHALLENGE 2.0

Day 15/20

Use `sample_data.csv` data set to answer the following questions.

Calculate:

- 1). Mean, mode, median and kurtosis for `column_b`
- 2) Calculate Mean, variance, standard deviation and skewness for `column_c`
- 3). Make a boxplot, Histogram and barplot using `sample_data.csv`

Use Jupyter notebook/lab and github and version your work well, Your project should have More than one branch and more than 5 commits.

Regards, Data Science East Africa Team.
